

User Manual

The calculator automatically calculates the cost of the selected options and shows how much XP remains to be spent. It also informs you about the most important errors, such as exceeding the available XP pool or breaking the Tree of Learning rule.

After launching the application, this will be the first view:

CHARACTER CREATION

ATTRIBUTES

S	T	A	I	WILL	INT	FELL	SPEED
1	1	1	1	1	1	1	6

SKILLS

SKILL	VALUE	SKILL	VALUE
Athletics (S)	0	Medicæ (Int)	0
Awareness (Int)	0	Persuasion (Fel)	0
Ballistic Skill (A)	0	Pilot (A)	0
Cunning (Fel)	0	Psychic Mastery (Will)	0
Deception (Fel)	0	Scholar (Int)	0
Insight (Fel)	0	Stealth (A)	0
Intimidation (Will)	0	Survival (Will)	0

In the upper-right corner, there are buttons for:

- Changing the language version
- Displaying this manual
- Returning to the main menu
- Opening the table with the maximum Attribute values for different Species

Pressing the last button displays the table. The calculator blocks the general maximum value for each Attribute (12) and Skill (8), but the Species limits from the table must be checked manually.

MAXIMUM ATTRIBUTE VALUES								
	STRENGTH	TOUGHNESS	AGILITY	INITIATIVE	WILLPOWER	INTELLECT	FELLOWSHIP	SPEED
Human	8	8	8	8	8	8	8	8
Ork	12	12	7	7	8	7	7	7
Aeldari	8	7	12	12	12	10	6	10
Adeptus Astartes	10	10	9	9	10	10	8	9
Primaris Astartes	12	12	9	9	10	10	8	9
Ogryn	12	12	7	4	8	1	4	8
Ratling	6	6	10	10	8	8	10	7
Kroot	12	12	12	12	10	6	6	10
Drukhari	8	8	12	12	10	10	6	10
Wraith Construct	12	12	8	8	12	10	4	8

In the upper-left corner, there is a field for entering the pool of Experience Points available to spend, as well as buttons for saving and loading the entered information. The application stores only the most recent save. Each subsequent use of the “Save” button overwrites the previous state.

HOW TO USE THE APPLICATION

Step 1

Choose an Archetype from the rulebook and copy the guaranteed Attribute and Skill values into the application.

This example uses the “Sister Hospitaller” Archetype from page 91 of the Core Rulebook.

This Archetype guarantees 3 points in **Intellect** and **Willpower**, as well as 1 point in **Medicae** and **Scholar**.

The first step is to copy these values into the application.

SISTER HOSPITALLER					
TIER	1	SPECIES	Human	XP Cost	24
KEYWORDS: IMPERIUM, ADEPTUS MINISTORUM, ADEPTA SORORITAS, [ORDER]					
ATTRIBUTES: Willpower 3, Intellect 3					
SKILLS: Medicae 1, Scholar 1					
ARCHETYPE ABILITY: Loyal Compassion

SKILLS

SKILL	VALUE	SKILL	VALUE
Athletics (S)	0	Medicae (Int)	1
Awareness (Int)	0	Persuasion (Fel)	0
Ballistic Skill (A)	0	Pilot (A)	0
Cunning (Fel)	0	Psychic Mastery (Will)	0
Deception (Fel)	0	Scholar (Int)	1

Step 2

This is the MOST IMPORTANT step! You now need to set the value that should appear in the “XP Remaining” field by entering the appropriate value in the “XP Pool to Spend” field.

The calculator does not automatically subtract the cost of the Archetype. Therefore, after copying the values guaranteed by the Archetype, you need to check whether the “XP Remaining” field shows the correct value: the starting XP pool minus the cost of the Archetype.

For example, let us assume that we are playing at Tier 1, with no XP bonuses or penalties, so the available pool is 100 XP.

The “Sister Hospitaller” Archetype costs 24 XP. This means:

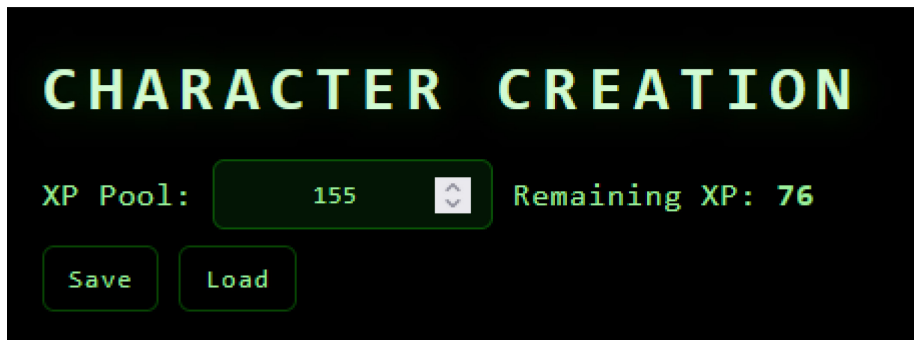

$$100 \text{ [starting XP pool]} - 24 \text{ [Archetype cost]} = 76$$

In this example, the “XP Remaining” field should show 76, so nothing needs to be changed in the “XP Pool to Spend” field. However, this is not always the case. It all depends on the Tier of play, the chosen Archetype, and the Game Master’s decision regarding the amount of XP available to the players.

This is the only calculation that must be done manually. Character Archetypes are not hard-coded into the application. Thanks to this, the calculator remains homebrew-friendly and can be easily adapted both to official materials and to custom classes, Archetypes, or rules created by players and Game Master.

Additional Step

If the “**XP Remaining**” field shows the correct value, I recommend clicking the “**Save**” button.

A screenshot of a 'CHARACTER CREATION' interface. The title is in large, green, pixelated font. Below it, 'XP Pool:' is followed by a green input field containing the number '155' and a small up/down arrow icon. To the right, 'Remaining XP: 76' is displayed in green. At the bottom, there are two green buttons labeled 'Save' and 'Load'.

An additional confirmation window will appear.

A screenshot of a 'SAVE CONFIRMATION' dialog box. The title is in green, pixelated font. Below it, the question 'Do you want to save the current character state?' is written in green. In the center, there is a square frame containing a detailed illustration of a small, dark, horned creature with a large, open book on its back. At the bottom right, there are two buttons: a red one labeled 'Yes' and a green one labeled 'No'.

By saving the state immediately after entering the values guaranteed by the Archetype, it becomes easy to undo all later changes and start allocating points again from the beginning.

Clicking the “Load” button will also display a confirmation window.

Step 3

If the “**XP Remaining**” field shows the correct value, you can start filling in the fields, and the application will perform all necessary calculations automatically.

The application displays warnings and errors, but it does not block further editing. Before finishing character creation, it is worth correcting them, unless the Game Master knowingly allows an exception to the rules.
